2028_REC_OOPS using Java_Week 12_Q2

Attempt : 1
Total Mark : 10
Marks Obtained : 10

Section 1 : Coding

1. Problem Statement

Alex is learning about Java's functional interfaces and lambda expressions.

He wants to write a simple program that prints the square of each number in an array using a predefined functional interface.

Help Alex complete this task using the Consumer functional interface.

Input Format

- The first line contains an integer N, the number of elements in the array.
- The second line contains N space-separated integers.

Output Format

- Print the squares of all elements in the array, separated by a space.

Refer to the sample output for formatting specifications.

Sample Test Case

Input: 4

1 2 3 4

Output: 1 4 9 16

Answer

// You are using Java

```
import java.util.Scanner;
```

```
import java.util.function.Consumer;
```

```
class SquareNumbers {  
    public static void main(String[] args) {  
        Scanner scanner = new Scanner(System.in);
```

```
        int n = scanner.nextInt();
```

```
        int[] arr = new int[n];
```

```
        for (int i = 0; i < n; i++) {  
            arr[i] = scanner.nextInt();  
        }
```

```
        Consumer<Integer> printSquare = num -> System.out.print((num * num) + "  
        ");
```

```
        for (int i = 0; i < n; i++) {  
            printSquare.accept(arr[i]);  
        }
```

```
        System.out.println();
```

```
        scanner.close();  
    }  
}
```

Status : Correct

Marks : 10/10
