## 2024\_28\_III\_OOPS Using Java Lab

### 2028\_REC\_OOPS using Java\_Week 12\_Q1

Attempt : 1  
Total Mark : 10  
Marks Obtained : 10

#### Section 1 : Coding

##### 1. Problem Statement

Sabrina is working on a project that involves analyzing a set of numbers. In her exploration, she encounters scenarios where extracting even numbers and finding their sum is essential.

Create a program that calculates the sum of even numbers from a given array of integers using a lambda expression.

##### ***Input Format***

The first line of input consists of an integer N, representing the size of the array.

The second line consists of N space-separated integers, representing the elements of the array.

##### ***Output Format***

The output prints the sum of the even integers from the array.

Refer to the sample output for formatting specifications.

### **Sample Test Case**

Input: 3

29 37 45

Output: 0

### **Answer**

// You are using Java

```
import java.util.Scanner;
```

```
import java.util.Arrays;
```

```
class EvenSum {  
    public static void main(String[] args) {  
        Scanner scanner = new Scanner(System.in);
```

```
        int n = scanner.nextInt();
```

```
        int[] arr = new int[n];
```

```
        for (int i = 0; i < n; i++) {  
            arr[i] = scanner.nextInt();  
        }
```

```
        int sum = Arrays.stream(arr)  
            .filter(num -> num % 2 == 0)  
            .sum();
```

```
        System.out.println(sum);
```

```
        scanner.close();
```

```
    }  
}
```

**Status :** Correct

**Marks :** 10/10
